THE COUPON BUREAU

DEVELOPER PORTAL HIGHLIGHTS

A robust and easy to use API that will connect your organization to the universal positive offer file.

1 STAND ALONE DEVELOPER PORTAL

Built for developers, the portal is designed to make the integration process efficient and streamlined with real-time code and API keys, the portal makes quick work of your development time.

2 EXTENSIVE DOCUMENTATION

The API Documentation uses interactive keys and allows for robust key generation. This documentation provides step by step integration and walks you through the development of connectivity.

3 INTEGRATED TESTING FEATURES

The API Console allows you to test directly in the developer portal. With eight different implementation samples, this is a great resource to help develop quickly and accurately. Developers can detect and predict anomalies and correct them before deployment.

4 SANDBOX ENVIRONMENT

Test your integration inside the sandbox environment before moving to production.

5 AUTOMATED API SUBSCRIPTIONS

One-click API subscriptions make it easy to pull data from the bureau. The portal provides real-time data including response time and health of the API's.

6 AUTOMATED KEY REGENERATION

Key rotation is important to cover situations where your keys may have compromised and to provide you with ample security.

7 REALTIME API CONSTRUCTION

We provide code snippets in all major programming languages. A simple copy paste that code output is provided for ease of use.

8 MULTI-LAYERED SECURITY

Microsoft invests over a billion dollars annually into cybersecurity. Azure has hundreds of datacenters in 50 regions, and these have extensive multi-layered protections to ensure unauthorized users cannot gain physical access to your data.
